**1. Out of 100, what percentage of the project do you think you contributed to?**

I think I have contributed about 30% to this project.

**2. Describe your individual contribution to the project (max 1/2 page).**

During the process of the project, the first contribution that I had was part of the idea of what to do once we decided to do a comparison project about decentralized worlds. The idea of a scene with some sort of interaction in it, which then developed to make a simple transaction with the Decentraland token, MANA. I did a first brainstorm of information at the early stages of the report. I also contributed to the implementation of the code, the deployment of the scene in the Decentraland ecosystem, as well as the corresponding explanations in the report. Both MetaMask wallets are mine, as well as the Binance account used to perform the simulation and rent of the LAND. When every member of the group had their videos ready (I was in charge of the deployment & simulation), I was the one putting them all together.

Finally, I also created the GitHub repository, with the README, as well as uploading the final video and PDF of the report.
