

Camila Almada NIA229891 Blockchain evaluation

1.Out of 100,what percentage of the project do you think you contributed to?

I think that I have contributed 20%.

2.Describe your individual contribution to the project (max 1/2 page).

I have given the idea to my teammates of doing this project about decentralized virtual reality. I came up with this idea because I always had interest in virtual worlds and before starting this subject I found Decentraland and its blockchain technologies, so later I thought that it could be exciting to do a project related to this.

Moreover, I have collaborated in the explanation of almost all the abstract. I have also strongly collaborated in the introduction, contribution, the related work, the background, terminology and definitions. For this task I used the information that I have found from the literature and also the information that my teammates searched. I have also helped in explaining the conclusions and organizing the references. In addition, I have done the slides shown in the video and I have presented the introduction and related work of our project. Moreover, I have also created a basic scene to do some trials although my teammates have explored more about this part.
